

Ocean, Climate and Space colloquium

How satellite remote sensing help us to understand our planet.

When: Friday 7 December 9:20 to 12:30

Seminar room, dept. of Oceanography, University of Cape Town

Organised and presented by the Nansen-Tutu center for Environmental Research in collaboration with the MARE institute, the Dept. of Oceanography of University of Cape Town and the CSIR (NRE) as a side event of the ACCESS workshop on Marine Science

Program

9:20 9:30 Welcome: Mathieu Rouault

9:30 9:45 *Ocean around South Africa* Frank Shillington

9:45 10:00 *Satellite Oceanography*: Johnny Johannessen

10:00 10:15 *Ocean currents* Marjolaine Krug

10:15 10:30 *Ocean color and sea surface temperature* Christo Whittle

10:30 11:00 tea and coffee

11:00 11:15 *Mozambique Channel studies* Issufo Halo

11:15 11:30 *Ocean atmosphere interaction* Mathieu Rouault

11:30 11:45 *Ocean climate variability* Francois Dufois

11:45 12:00 *Indian Ocean Climate change* Bjorn Backeberg

12:00 12:15 guest presentation (contact M Rouault)

12:15 12:30 guest presentation (contact M Rouault)
